South Shore COVID-19 Testing Site Set to Close End of March

SOUTH MILWAUKEE – The South Shore (Zone E) Testing Site located at 1625 10th Avenue (Former Bucyrus Campus) in South Milwaukee is set to close permanently after testing hours conclude on March 30, 2021.

The Cudahy, Oak Creek, and South Milwaukee/St. Francis Health Departments joined forces to establish this site in October of 2020 to make testing accessible to residents in the South Shore at a time when these services were very limited. Since the opening of the site, approximately 18,000 individuals have been tested.

The Health Departments and the municipalities are appreciative of the partnerships with the Wisconsin National Guard for providing the specimen collection team and Milwaukee County for assisting with funding the site in 2021.

Residents can access information regarding testing locations in Milwaukee County at www.testupmke.com and by calling 2-1-1. Additional information is available at the Department of Health Services (DHS) website <https://www.dhs.wisconsin.gov/covid-19/testing.htm>.
